ANGELO LO 羅安傑

Manufacturing Digital Transformation | AI Applications | Full-Stack Development

Taichung, Taiwan · angelo20011016@gmail.com · +886 908 360 618

PROFESSIONAL SUMMARY

Manufacturing digital transformation specialist with experience developing enterprise AI applications, internal web systems, and workflow automation. Primary technical owner for assigned projects, covering requirements, technology selection, architecture, development, testing, deployment, and improvement. Collaborate with business users and Japanese stakeholders to turn operational needs into practical digital solutions and evaluate AI tools, capabilities, and licensing against enterprise requirements.

PROFESSIONAL EXPERIENCE

Taiwan Murata

Digital Transformation / Information Management

Specialist Apr 2026–Present

IT Assistant May 2025–Mar 2026

Promoted to Specialist within the first year of employment.

Enterprise RAG & Quality Evaluation

Deployed

- Built and deployed an enterprise knowledge application using **self-hosted Dify and Azure OpenAI**, serving employees across Taiwan sites with Chinese, English, and Japanese retrieval.
- Expanded coverage to **2 departmental knowledge bases and 2 shared knowledge bases** for the employee welfare committee and labor union. Integrated **SharePoint** for daily automated updates, departmental maintenance, and access controls.
- Built an automated evaluation framework with **100+ internal test questions**, achieving a **90%+ AI-graded answer pass rate** on that test set, with human spot checks and log analysis.

MES AI Agent

POC completed

- Completed a POC integrating **10+ data sources**, including MES, document systems, and Excel manufacturing reports, through ETL to support natural-language manufacturing data queries.
- Applied controlled read-only database access and iteratively refined agent workflows and tool behavior to support manufacturing data retrieval.

Real-Time Transcription & Translation

Live event delivery

- Owned technology selection, development, and deployment for an official company event with **100+ participants over approximately 90 minutes**.
- Integrated **Azure AI Speech and Azure OpenAI** and evaluated local and cloud options against quality, latency, cost, and factory constraints.

Electronic Stamping & PDF Workflows

Deployed

- Developed a **full-stack internal web application** for PDF stamping, supporting Japanese managers and logistics as an alternative to paid PDF editing features.
- Integrated **company SSO**, identity-based access to signatures and stamps, and operation logging.

PPT Agent & Training Content Reuse

User testing

- Developed and deployed an AI-assisted application for user testing that converts presentations into training videos with narration and subtitles, supporting **natural-language content editing**.
- Enabled reuse of existing materials to support digitization and standardization of **new employee onboarding**.

Enterprise Integration & Automation

- Integrated internal platforms and partner web systems through **APIs, Python, and Power Automate cloud/desktop flows**. Used browser automation and data processing to streamline repetitive data collection and cross-system operations across departments.

Enterprise AI Evaluation & Adoption Support

- Supported **GitHub Copilot adoption and use across Taiwan sites**.
- Evaluated and trialed **ChatGPT Enterprise, custom GPTs, and Skills** for enterprise use cases and capabilities.
- Tested **Microsoft 365 Copilot and advanced M365 license features**, comparing tool capabilities and licensing options against internal needs to help teams use existing tools and licenses effectively.

Cross-Functional & Cross-Site Collaboration

- Facilitated **monthly digital knowledge meetings with departmental representatives**, published technology articles, and delivered **approximately 8 technical presentations**. Shared project practices and tool applications across sites to help departments identify workflow improvements and adopt digital tools.

PicSee | Business Development Intern

Jan 2023–Mar 2023

- Conducted B2B outreach, clarified customer requirements, prepared proposals, and supported competitor analysis and usage tracking. Worked with banking, media, and entertainment clients, developing requirements discovery, cross-industry communication, and software product presentation skills.

TECHNICAL SKILLS

Languages & web: Python, SQL, JavaScript, HTML/CSS

Application development: FastAPI, Streamlit, REST APIs

AI & speech: Dify, RAG, LLM integration and evaluation, agent tool calling, Azure OpenAI, Azure AI Speech

Data & integration: ETL, Oracle, SQLite, SharePoint, SSO, access controls, operation logging

Automation: Power Automate cloud/desktop flows, Selenium, Playwright

Development & deployment: Git, Docker, pytest, Cloudflare Tunnel (cloudflared)

Foundational knowledge: Java, Spring Boot, PostgreSQL, Google Cloud Platform

EDUCATION & PROFESSIONAL TRAINING

Tamkang University | Bachelor’s Degree in Management Science — Graduated Jun 2024

Government-Sponsored Vocational Training — Jan 2025–Mar 2025

Python, Artificial Intelligence, and Service Robotics

ccClub (Coding Coworking Club) | Python Programming Study Group

Project: Python and Selenium web scraping and ticket booking automation.

LANGUAGES

Mandarin Chinese: Native · English: Conversational proficiency · **TOEIC 770**
